Civil Engineering encompasses such a broad range of professional activities that the undergraduate preparation for the Bachelor of Science degree must be devoted primarily to fundamental analytical principles and basic design applications. For technical competence in specialized areas and continued effectiveness on the job, graduate study is becoming increasingly necessary.

The Civil Engineering Department offers a graduate program of study in the area of Environmental Engineering leading to a Master of Science Degree in Civil Engineering. The program offers opportunity for advanced study and research in air resources, air toxics control, treatment of drinking water, industrial waste minimization, integrated waste management, wastewater reclamation, toxic substances control, management of hazardous waste, hazardous waste site remediation, forecasting environmental impacts, designing environmental impact mitigation measures, and the application of simulation models and mathematical programming to resource allocation and environmental quality management problems.

**ADMISSION REQUIREMENTS**

Admission as a classified graduate student in Civil Engineering requires:

- an undergraduate degree in Civil Engineering and
- a minimum 2.80 grade point average both overall and in upper division engineering courses.

In addition, the merit of past academic endeavor, potential for future study, and professional goals may also be considered for granting admission.

Applicants who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Students with a baccalaureate degree in a field other than Civil Engineering (e.g., Biology, Chemistry, Geology, Environmental Studies) who wish to pursue the graduate program in Environmental Engineering will be considered on an individual basis. These students may be admitted as Conditionally Classified students and will be required to complete a specific list of undergraduate prerequisite courses to correct undergraduate deficiencies. These students must have an approved study program on file with the Department while undertaking their qualifying work. On completion of these courses with a grade point average of 2.80 or better, the student may apply for classified graduate status in Civil Engineering. Students with baccalaureate degrees in Electrical, or Mechanical Engineering may only need to take a few (two or three) additional courses.

**ADMISSION PROCEDURES**

All prospective graduate students, including CSUS graduates, must file the following with the CSUS Admissions Office:

- an application for admission and a supplemental application for graduate admission at [http://www.csus.edu/gradstudies/gradadm.htm](http://www.csus.edu/gradstudies/gradadm.htm)
- two sets of official transcripts from all colleges and universities attended, other than CSUS.

Students are strongly urged to apply by April 1 for admission to the following fall semester, or October 1 for the following spring, in order to allow time for application processing before registration deadline.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant. After being admitted, students must complete a Graduate Student Advising Form (obtainable in the Civil Engineering Department) and get their study program approved by an Environmental Engineering
faculty advisor. This advising form must be kept current and on file in the department office.

ADVANCEMENT TO CANDIDACY
Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the graduate student has:

- removed any deficiencies in Admission Requirements and
- obtained classified graduate status and
- completed at least 12 units in the graduate program with a minimum 3.0 grade point average, including at least three courses at the 200 level and
- passed the Writing Proficiency Examination (WPE) and
- selected a culminating requirement (Plan A, B, or C) and obtained approval of thesis or project topic.

Advancement to Candidacy forms are available in the Office of Graduate Studies. The student fills out the form after planning a degree program in consultation with an Environmental Engineering Faculty advisor. The completed form is then approved by the Graduate Coordinator of the Department and submitted to the Graduate Center.

DEGREE REQUIREMENTS
The Master of Science degree requires completion of a minimum 30 units of course work and research with a minimum 3.0 grade point average. An outline of degree requirements follows.

Required Courses (18 units)
- Engr 203 Engineering Statistics (3 units)
- A minimum of 15 units from the following:
  - CE 250 Systems Analysis of Resources Development (3 units)
  - CE 252A Environmental Quality Processes I (3 units)
  - CE 252B Environmental Quality Processes II (3 units)
  - CE 252C Environmental Quality Processes III (3 units)
  - CE 254 Water Quality Management (3 units)
  - CE 255 Fate and Transport of Chemicals in Soil Systems (3 units)
  - CE 276 Ground Water Hydrology (3 units)

Elective Courses (6-9 units)
Elective courses are selected with the prior approval of the student's faculty adviser to make up the required units of coursework (excluding the culminating requirement) for the degree, and may include 3 units of CE 299 Special Problems. This course may be used to examine potential thesis or project topics, review pertinent literature and prepare a research proposal.

Culminating Requirement (3-6 units)
Choose one of the following plans with the approval of the faculty advisor:
- Plan A: CE 500 Master's Thesis, 3-6 units (Approval of two faculty readers and a presentation are required)
- Plan B: CE 500 Master's Project, 3-6 units (Approval of two faculty readers and a presentation are required)
- Plan C: CE 500 Master's Degree Individual Study, 3 units and a Comprehensive Examination administered by a departmental committee of three faculty members are required.

FURTHER REFERENCE
All graduate degree programs are subject to general university requirements for graduate degrees, explained in the "Graduate Studies" section of the CSUS Catalog.

For more information on this graduate degree program, contact the Civil Engineering Department • 6000 J Street • Sacramento, CA 95819-6029 • (916) 278-6982 or Dr. John Johnston • (916) 278-7939 or (916) 278-8113 Dr. Ed Dammel • (916) 278-6983

To obtain a CSUS application booklet, contact the CSUS Graduate Center • 6000 J Street • Sacramento, CA 95819-6054 • (916) 278-6470
