California State University, Sacramento  
Department of Computer Science  
M.S. in Computer Science Program  
Graduate Learning Goals/Objectives and Program Learning Outcomes

<table>
<thead>
<tr>
<th>Graduate Learning Objectives</th>
<th>Graduate Learning Outcomes</th>
</tr>
</thead>
</table>
| Master, integrate, and apply advanced knowledge and skills to solve complex computer science problems. | a. Apply advanced knowledge of mathematics, algorithmic principles, computing theory, and principles of computing systems in the modeling and design of computer-based systems.  
b. Apply hardware design or software development process that includes requirements, design, development, verification and validation.  
c. Apply current technology and best practices in the development of computer-based systems of varying complexity. |
| Produce quality technical and non-technical documents and presentations for a variety of audiences. | a. Use proper structure, syntax, and organization.  
b. Communicate effectively technical content.  
c. Deliver oral presentations effectively. |
| Demonstrate the ability to be creative and analytical, and to contribute to the discipline.     | a. Create novel ideas, algorithms, and/or theoretical solutions; or develop new techniques and/or innovative implementations for a new or existing problem. |
| Demonstrate the ability to obtain, assess, and analyze developments and advancements in computer science. | a. Perform a thorough study and evaluation of related work.  
b. Evaluate the current methodologies and state of the art technologies. |
| Adhere to ethical standards of the profession.                                                | a. Understand, and abide by, ethical standards. |
| Understand the social and global implications of his/her professional activities.              | a. Understand the implication of his/her professional activities. |
